

ARROWQUIP

For Immediate Release: October 16, 2017

Arrowquip International Headquarters: Arrowquip is pleased to introduce the newest member of the Arrowquip Family, Feed Pro of Sunset, LA. Feed Pro is the first Authorized Dealer bringing Arrowquip to the state of Louisiana!

Of their newest Authorized Dealer, Arrowquip President Andrew Firth said, *“We have been waiting to find the right dealership in Louisiana to partner with, and have found that partner in Feed Pro. We couldn’t be happier to have Feed Pro joining our Authorized Dealer Network and bringing Arrowquip to ranchers in Louisiana”*.

Arrowquip was founded in 1988 by the Firth family in Australia with the mission:

“To influence the livestock handling industry globally through the practical application of animal science and welfare standards, and increase producer safety and profitability with innovative equipment”.

In the last 30 years, Arrowquip has become a world-renowned manufacturer of cattle handling solutions known for their innovative designs, technological advancements, investment in animal science, and forward-thinking equipment. They have become the most sought-after cattle equipment manufacturer in the market today.

Arrowquip’s New 600 Series Equipment, the Q-Catch 86 Series, Q-Power 106 Series, and Portable Q-Catch 86 Series have redefined the cattle handling industry with never before seen advancements in cattle handling. Arrowquip’s R&D Team looked at every contact point of the chute that might make enough noise to spook the animal and spent over 2,000 hours engineering a solution for each one. The result is a lineup of chutes like no other that are quick, quiet, and built with the quality that only Arrowquip can provide. By adhering to animal science standards and refusing to settle for “good enough” with their equipment, **Arrowquip has designed a lineup of chutes that offer unparalleled access and absolute silence to the rancher operation.** The 600 Series is the most innovative line of cattle chutes ever

produced, and ranchers around the world are seeking out their safe, easy to use, efficient cattle handling solutions.

Feed Pro will be bringing Arrowquip's 600 Series and full line of equipment, including the sought-after BudFlow® Cattle Tub, to ranchers in Sunset, LA and beyond.
